Helpful Hints when using Blackboard:

1. ‘Edit Mode’ button in the upper right corner needs to be ‘On’ if editing the site. Toggling it to ‘Off’ is the ‘student view’ of the course. (Note: Students are never able to see or access anything in the Control Panel.)
2. Use the ‘+’ sign at the top of the course menu to add items to the menu.
3. Use the ‘Build content’ dropdown at the top of any content page to add new content items to the site.
4. Menu items and content items can be reordered by be dragging and dropping them up and down.
5. The grade book, known as ‘Grade Center,’ is located in the Control Panel, bottom left. Click ‘Grade Center,’ then ‘Full Grade Center.’ Each site has two test students in the Grade Center.
6. The Content Collection (tab at the top) is where all course content is stored. In the Content Collection, navigate to your course folder in the Course Content section on the left. Once the course folder is selected, click the ‘Upload’ dropdown in the upper left and select ‘Upload Files’ to access the environment where you can drag and drop files and folders to your course.
